

```
#include <stdio.h>
int main(void)
{
    int count;

    for (count = 1; count <= 500; count++)
        printf("I will not throw paper airplanes in class.");
    return 0;
}
```

ANEND 10-3

NICE TRY.

What's the same?

C

Ruby

C

Indications: Performance

Indications:
wrap a C API

Other indications?

Let's Do It

4 Examples

- Hello `raleigh.rb`
- Random # Generator
- Passing values back and forth
- Factorial Speed Test

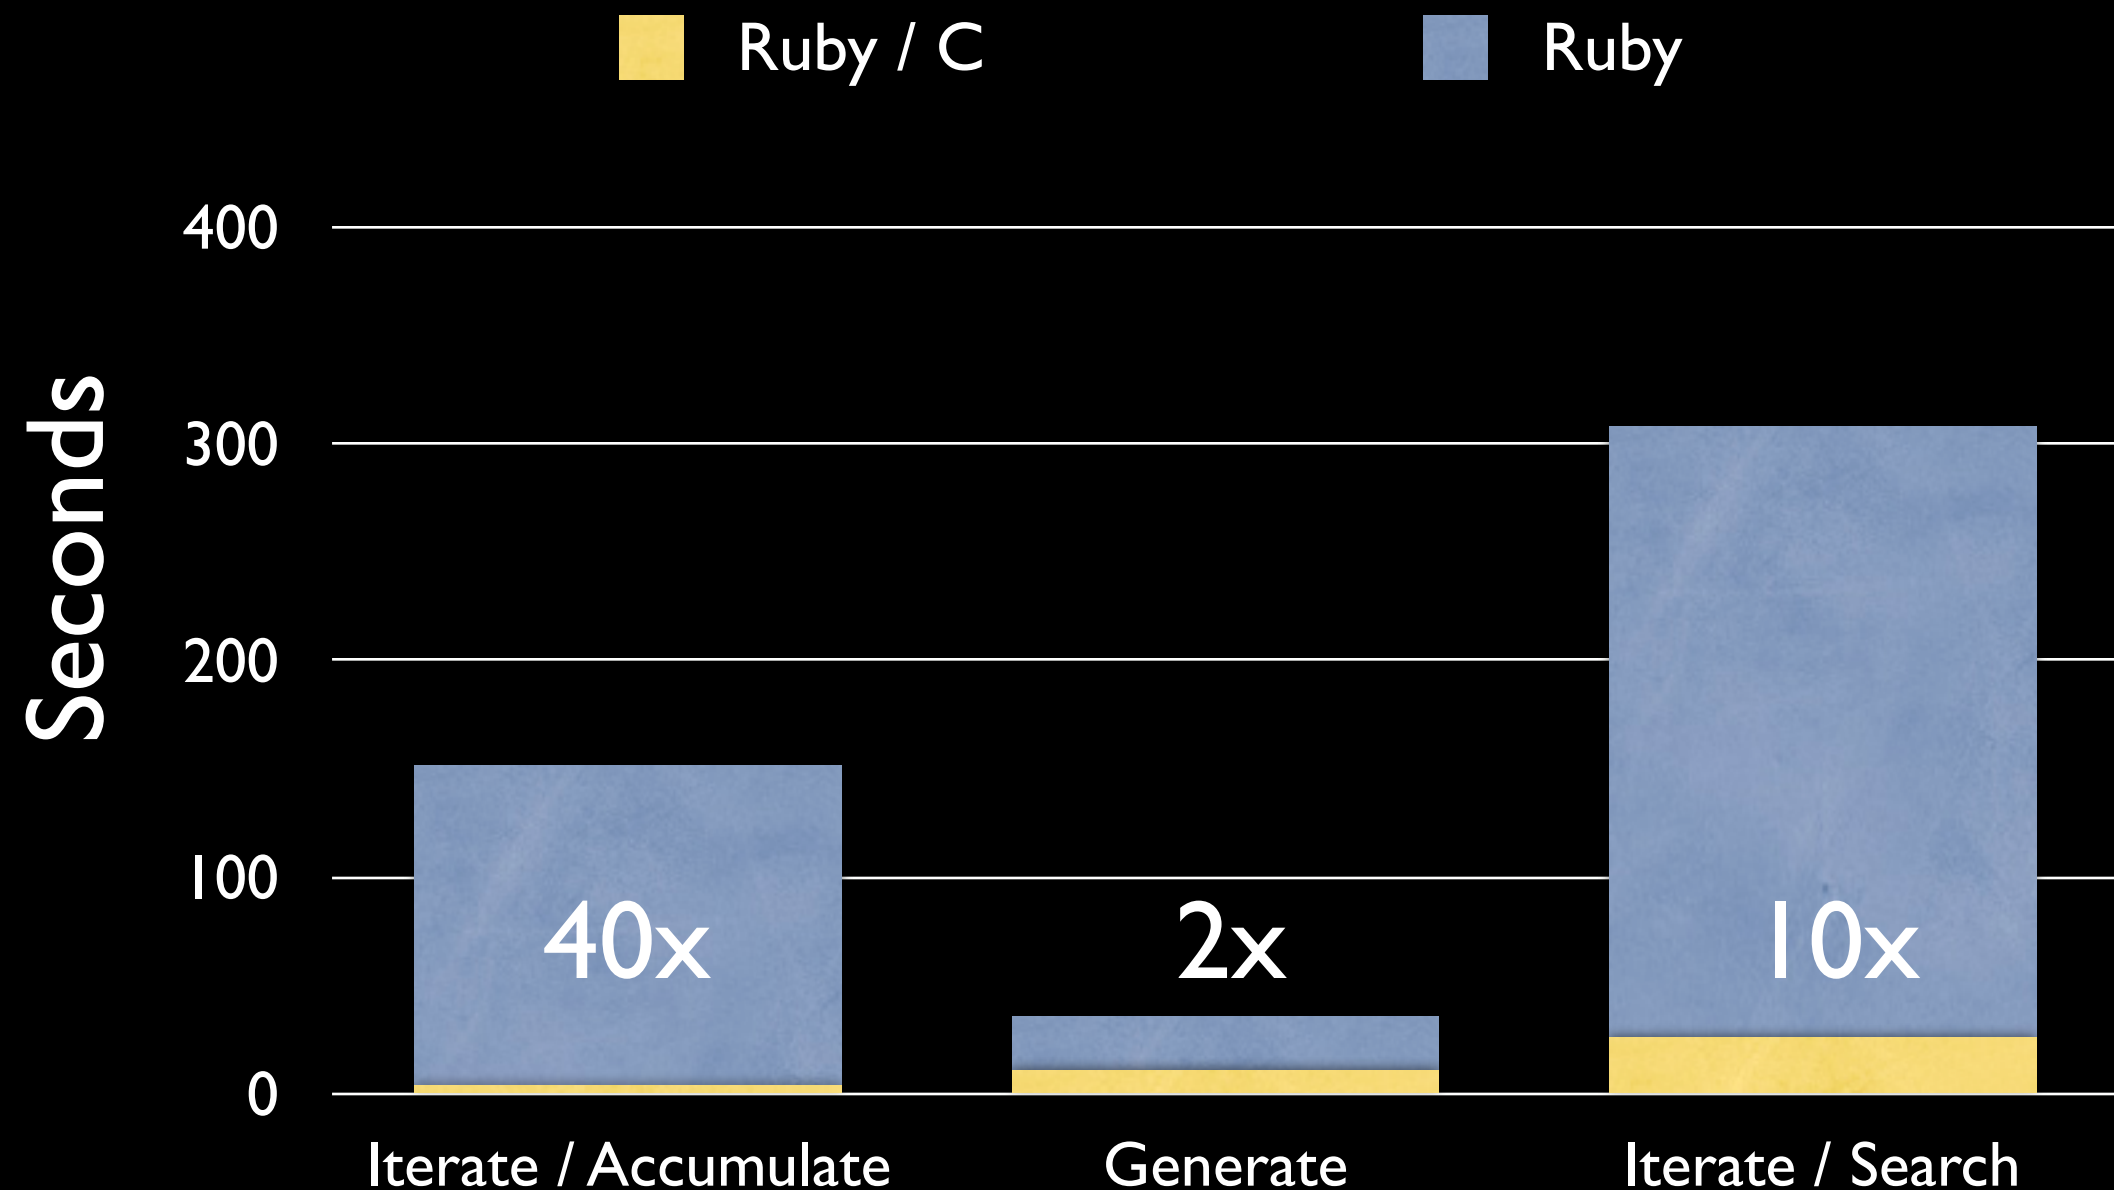

The Pattern

- **ruby.rb** - include the module defined in C, call like it's Ruby
- **c_file.c** - #include <ruby.h>, Init_module_name() {declare module, class and methods}
- **ruby extconf.rb**
- **make**

Data Types

- Nil
- Qtrue and Qfalse
- RBignum, RFloat, RClass, RArray, RHash, RFile
- VALUE - catch all!

Hexawise.com: Real World RoR App

Real World
Experiences?

Counter Indications?

Alternatives (better): Fast Ruby in 5 Steps

1. stop, isolate (require 'benchmark') & think
2. don't do it
3. keyboard → whiteboard
4. do it “right” (Google, Knuth)
5. optimize: know how to profile

Alternatives (small): RubyInline

- You got C in my Ruby!

```
inline do |builder|
  builder.c "
    void hello_c() {
      printf(\"Hello from C!\");
    }"
end
```

- Obviously won't scale for bigger jobs
- <http://www.zenspider.com/ZSS/Products/RubyInline/>

Alternatives (large):

C++

- C superset, C/C++ interoperability
- SWIG: <http://swig.org/>
- Rice: <http://rice.rubyforge.org/main.html>
- Experience?

Alternatives (GC'd): JRuby / Java

- Dropping to Java faster than Ruby?
- For what kinds of things?
- Your experiences?

Alternatives (functional): Haskell

- Who knows Haskell?
- But part of the new hip crowd
- Functional programming language
- Blazing fast if you know what's what
- Hubris: <http://github.com/mwotton/Hubris>

Alternatives (gratuitous?): D

- Who knows D?
- But coolly esoteric
- RuDy: <http://github.com/tomash/rudy>
 - Not actively developed (Early 2009)

Other alternatives?

Resources

Next Steps

- That's just about it!
- Objects
- Using native extensions in RoR
- Using native extensions in Gems
